

APPLICATIONS

Eni Acer MV 10 is a low viscosity oil for the lubrication of high speed spindles in machine tools.

It is based on high quality base oils blended with antirust and antioxidant additives.

Eni Acer MV 10 can be also used to lubricate stocking machine needles and as calibration fluids.

CUSTOMER ADVANTAGES

- Ensures long drain intervals thanks to very high oxidative stability
- Promotes the smooth running of high speed machine components thanks to low viscosity
- Ensures lubricated components protection thanks to excellent resistance against corrosion

SPECIFICATIONS & APPROVALS

- ISO 6743/2 FC

CHARACTERISTICS

Properties	Method	Unit of Measure	Typical
Appearance	visivo	-	clear
Density at 15°C	ASTM D 4052	kg/m ³	851
Viscosity at 40°C	ASTM D 445	mm ² /s	10
Viscosity Index	ASTM D 2270	-	103
Flash point (COC)	ASTM D 92	°C	165
Pour point	ASTM D 97	°C	-30
